This post was edited by feds64 at 17:27, Apr-21-2016

Over-hauled and updated: March 17, 2016.

Lately, it seem the new owners of Redmi Note 3 are getting lost and eventually frustrated without a proper guidance to how to unlock their bootloader. Hopefully, this guide will make the situation more transparent and give a better understanding on how to go about doing it.

NOTICE: This works for both Stable and Developer ROM.

First, register a Mi Account on your device or using your PC / Lappie, I would recommend, that you register using your phone number which will be quicker, but you could also register by email. As shown below:-

Device Redmi Note

MIU V7.2.3.0.LF

Online 979 Hour

Send PM

Next, download the Millet Tool or Mi Flash Unlock Tool and launch it accordingly.

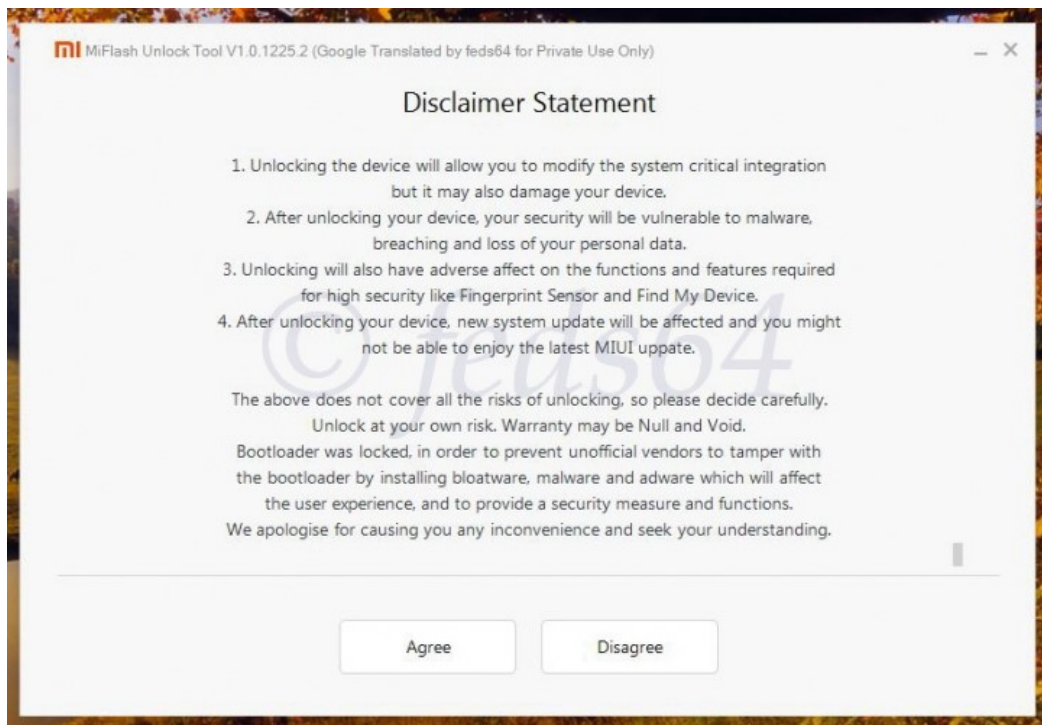

EDIT (March 17, 2016): [Official MiFlashUnlock 1.1.0317.1 en.zip](#)

One of these situations may happen:-

SCENARIO 1. Either you are accepted on your first trial run, and able to complete the progress of unlocking or;

SCENARIO 2. You just need to make an application and wait for a confirmation / permission to unlock via SMS.

You will encounter, as shown on the illustrations below:-

feds64

Moderator

JUST DO IT

Device Redmi Note

MIU V7.2.3.0.LF

Online 979 Hour

Send PM

While validating your account for unlock support, you might encounter as shown below, but be sure to retry once or twice (the validity server might be congested):-

Device Redmi Note

MIU V7.2.3.0.LF

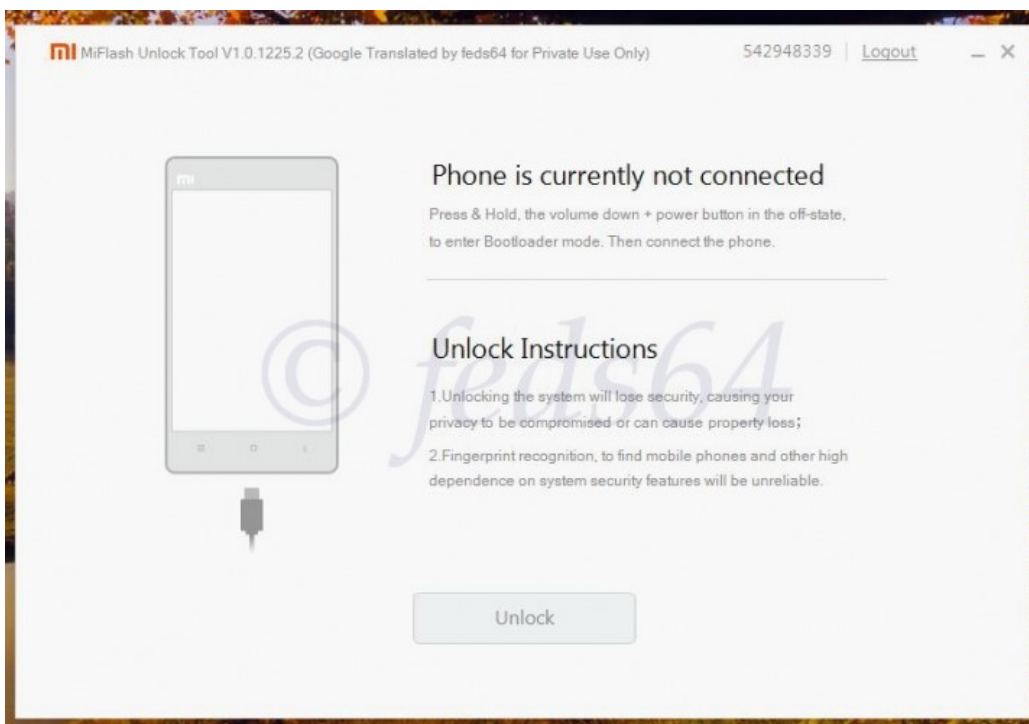

Online 979 Hour

Send PM

You will then see one of two screens to decide, whether you are going forward with the unlocking of the bootloader or to make an application for permission to Unlock the Bootloader, as the following:-

SCENARIO 1. When you see the following screen, you can go ahead to unlock the bootloader. As shown below:-

For Unlocking the bootloader, go to this thread:-

UNLOCKING YOUR BOOTLOADER, ROOTED for REDMI NOTE 3 MTK

<http://en.miui.com/thread-199580-1-1.html>

Observation on the BOOTLOADER UNLOCKED privilege

<http://en.miui.com/thread-201565-1-1.html>

SCENARIO 2. Should you see the following screen, don't be alarm or discouraged but to positively, click "Go" and follow the instructions and fill out the necessary application, as shown below:-

In the following illustration, you have to READ CAREFULLY, the Unlocking Risk on the right side of the page, before embarking to accept the "Millet Phone Unlock Agreement" which may result in your warranty to be "Null & Void", make a wise decision. Here, you need to fill your name in the first column box, followed with your phone number / email, and finally you have to "State the reason of unlocking" in the big column box, I recommend you to copas (copy & paste) the following Chinese character to avoid any rejections, 我明白解锁的设置 它给我的介绍是 重新设置我的原本语言 谢谢 (which means, "I understand the risk of unlock bootloader. It is required for me to flash custom recovery for my native language. Thank you."), as shown below:-

In the following screen, is an example of my OTP SMS, which you will receive almost immediately, after "Accepting the Agreement" on the previous screen, and follow thru, as shown below:-

 Online 979 Hour
 Send PM

Key-in the OTP code from the SMS, and hit enter, as shown below:-

You will get the following imagery, which informs you that your application is successfully done and you need to wait for a week or so, and if you do not get any notification, file in a Complaint accordingly, as follows:-

Send PM

MIUI Devices Redmi Note 3

Home > Services > Unlock millet phone

Unlock application permissions

Application has been successfully submitted, please be patient review

After approval, we will notify you via SMS.
If the audit over 10 days did not pass, go forum - Complaints Forum Posts inquiry

[To forum to see >>](#)

Unlock risk

1. Unlock the device will allow to modify the system critical components, and may to some extent result in equipment damage;
2. After unlocking device security assurance will lose vulnerable to malware attacks, resulting in leakage of personal privacy data;
3. Unlock partially dependent functions and services for high security systems, such as: Find mobile phones, value-added services will fail;
4. After unlocking function of the system has been modified, a new version of the system will affect the upgrade, you can not experience the latest MIUI services;
5. Brush unlock due to hardware failure caused, millet sales service network can be non-warranty processing, according to the ordinary software maintenance warranty charge.

The above does not cover the risks brought unlock, if you are not familiar with the brush machine operation, please choose carefully.

FOLLOW-UP: Normally the waiting period is within 2 weeks.

Should you be waiting longer than the stipulated waiting period, please make a Complaint accordingly, at the following links:

For those who have waited more than 12 days, please reply to the following thread with your Xiaomi account number:-

<http://en.miui.com/thread-202290-1-1.html>

If you have received SMS to unlock but the bootloader is still having problems to unlock due to the following errors:-

- Couldn't verify device" error when trying to unlock
- Unlocking process stuck at 50%, "
- Current account is different from the account info on the device

Please report it on the following link:-

Just run this tutorial...

<http://en.miui.com/thread-199580-1-1.html>

Sorry I was in a foreign country and was not able to reply before today!

It does not work. I got this red error :

申请理由需要超过10个字符

= Apply a reason with more than 10 characters

I don't understand because I've entered a reason with more than 10 characters !

I used a translator to write the reason in traditional chinese characters and also in simplified chinese characters but same error !

Tried again with shorter reason and it has worked: copy/paste this reason:

我想解開我的紅米手機注3引導程序請

I received the confirmation by SMS instantly !!

Thanks for your help!!

OMG.....after wait so long for sms now i got error on unlocking process, same like the others. stu ...

i think, many official thread explain....even unlock tool support both developer and stable rom, many case solved by installing developer rom... i will try unlock with developer rom and let other now if it works.

soon..Edit:

Yes its works....

Used last developer rom.

And i think the most important step is :

WHEN YOU FIRST LOGIN TO XIAOMI ACCOUNT ON SETUP WIZARD, LET DEVICE LOCATION FIND YOU AND DETECT WHICH ACCOUNT THAT CONNECTED TO THIS DEVICE.

SO YOU DONT NEED TO INPUT PHONE NUMBER OR EMAIL, "YOU JUST NEED TO INPUT PASSWORD BECAUSE ACCOUNT AUTOMATICALLY FOUND" .

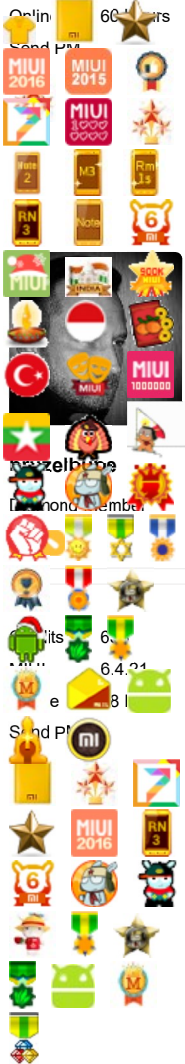

----- PROBLEM SOLVED -----

To be able to get it verified you must use one account at a particular time. You need to logged ou ...

I also try this way...
I'll know if I can
thanks for now

Hi feds 64...!
try another pc... Install new adb driver, log ex novo in tool....
same problem

how about 50% issue (have previous account on the phone but forgot password)?

Just read the tutorial completely especially the last part.
