

Greetings from realme Mobile

This guide will show you how to use the phone and its important functions. You may also visit realme official website to get more information about the phone.

Warning:

- Do not place the phone or battery near or inside the heating equipments, cooking equipments, high pressure vessel (such as microwave ovens, induction cooker, electric oven, heater, pressure cooker, water heater, gas stove, etc.) to prevent the battery overheating which may lead to an explosion.
- The original charger, data cable and battery shall be used. Unapproved chargers, data cables, or batteries that are not certified by the manufacturer may result in electric shock, fire, explosion, or other hazards.

عند الشحن، يرجى وضع الجهاز في بيئة ذات درجة حرارة جوية معتدلة وتجنبه جوية يوصى بشحن الجهاز في بيئات ذات درجة حرارة تتراوح بين 5 درجة مئوية و 35 درجة مئوية.

كيفية إعادة تشغيل الهاتف:

الرسم المتحرك لتشغيل هاتف realme لإعادة تشغيل الهاتف.

الضغط مع الاستمرار على زر التشغيل و زر رفع الصوت في الوقت نفسه حتى يتم عرض

كيفية نقل المحتويات من هاتف قديم إلى هاتف جديد

يمكنك نقل محتويات مثل الصور والتسجيلات والفيديو والملفات والموسيقى جهات الاتصال والرسائل والتعليقات من هاتف قديم إلى هاتف جديد عبر تطبيق نسخ الهاتف من realme.

1 مسح رمز QR أثناء استخدام الهاتف القديم لتنشيط "نسخ الهاتف". وعلى الهاتف الجديد، النقر "مسح الهاتف" متابرة.

2 اتبع التعليمات الموجودة على الشاشة وكلمة نقل الهاتف.

الملاحظات الفنية

سيتم تزويده بالمعلومات الفنية التالية:

1 هاتف، 1 شاحن، 1 أداة لإزالة الخراج بطاقة SIM

1 كابل بيانات USB، 1 دليل ملصق، 1 دليل سريع.

FCC Regulations:

This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device must not cause harmful interference.
(2) This device must accept any interference received, including interference that may cause undesired operation.

This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

- However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.

Specification

Product	RMX2020/RMX2021/RMX2022
Main screen parameter	16.5cm(6.5")
Dimension	164.4x75.4x8.9(mm)
Battery	4880mAh/18.88Wh(Min) 5000mAh/19.35Wh(Typ)
Camera	5Megapixels Front +2Megapixels Rear
Operating temperature	0°C-35°C
SAR Values	CE SAR <2.0W/kg(Head) <2.0W/kg(Body)

Radio	Radio Waves Specifications
	Frequency
GSM	850MHz 900MHz 1800MHz 1900MHz
WCDMA	Bands 1/2/4 Bands 5/8
LTE FDD	Bands 1/2/3/4 Bands 5/8/20/28
LTE TDD	Band 7
Bluetooth	Bands 38/40/41
2.4G Wi-Fi	2.4-2.4835GHz
NFC	2.4-2.4835GHz 13.56MHz

يسمى لك هذا الدليل كيفية استخدام الهاتف ووظائفه المهمة. يمكنك أيضًا زيارة موقع الويب الرسمي للهاتف realme للحصول على مزيد من المعلومات حول الهاتف.

تحذير:

- لا تضع الهاتف أو البطارية بالقرب من أجهزة التدخين أو النيران أو الأواني ذات الضغط العالي أو بداخلها (على سبيل المثال أفوان الميكروويف والمواقد التي يعمل الغاز، وما إلى ذلك). وذلك لمنع البطارية بدرجة حرارة مما قد تسبب في حدوث انفجار.
- تجنب استخدام الشحن والبطارية وكابلات البيانات الأصلية. قد تسبب التزاحم أو كوابل البيانات أو البطاريات غير المتتمدة من الشركة المصنعة في حدوث صدمة كهربائية أو حرق أو انفجار أو حطوط أخرى.
- الغذاء الكهلي لا يمكن أترعه.

	2.4-2.4835GHz 13.56MHz	Bluetooth 2.4G Wi-Fi NFC

This device is certified with SAR for general population / uncontrolled exposure limits in ANSIEEC C95.1-1992 and had been tested in accordance with the measurement methods and procedures specified in IEEE1528.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/eet/ea/fccid after searching on FCC ID: 2AUJFRMX2020.

For this device, the highest reported SAR value for usage against the head is 1.19 W/kg, for usage near the body is 0.75 W/kg.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirements.

SAR compliance for body-worn operation is based on a separation distance of 10 mm between the unit and the human body. Carry this device at least 10 mm away from your body to ensure RF exposure level compliant or lower to the reported level. To support body-worn operation, choose the belt clips or holsters, which do not contain metallic components, to maintain a separation of 10mm between this device and your body.

RF exposure compliance with any body-worn accessory, which contains metal, was not tested and certified, and use such body-worn accessory should be avoided.

FCC Note:
Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Information (SAR)
This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States.

During SAR testing, this device was set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage against the head with no separation, and near the body with the separation of 10 mm. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The exposure standard for wireless devices employing a unit of measurement is known as the Specific Absorption Rate, or SAR.
The SAR limit set by the FCC is 1.6W/kg.
